ACL 3200 HE Flare Stack Ignition System

ACL 3200 HE Flare Stack Ignition System

The **ACL 3200 HE Ignition System** can be used on any flare stack system. It's ignitor can be mounted directly onto a trolley system providing a fully retractable pilotless ignition.

Provides high energy ignition spark to light all types of flare stack waste gases

Requires no pilot

Waterproof tip allows for ignition in wet and severe conditions

Intermittent spark set by onboard timer

Fully retractable trolley system

12/24 VDC and solar operations

Alarm capabilities

CSA approved
