Manufacturing Inc.

ACL Ignition System
ACL 1000
Pilot Ignitor

This self powered unit incorporates a pilot, ignitor and superior stainless steel nozzle within a compact 1 inch connection. The ACL 1000 provides safe and reliable ignition for all types of reboilers, line heaters, treaters and many other gas fired burners. The ACL 1000 is an economically priced innovation that replaces and improves upon all existing competitors products within the industry.

Features and Benefits

- Aluminum and SST construction resists corrosion
- Superior SST pilot nozzle design for reliable and long lasting operation
- Compact design allows unit to fit in existing 1” connection, therefore eliminating expensive installation costs
